

Virobuild™

BREAKING NEW GROUND IN THE SYNTHETIC THATCH BUSINESS.
NEW FIBERS THAT ARE FIRE RETARDANT, PEST FREE, 100% RECYCLABLE.

With three years in the making, Virofiber™, the leading maker of synthetic wicker, has launch an innovative synthetic thatch solution that is Fire Retardant, Pest Free and 100% Recyclable. Virothatch™ uses a reproduction process that replicates Balinese thatch-work artistry. The thatch is woven like traditional thatch-work making it beautifully finished both inside and out. This gives installers a seamless thatched look that is the most authentic and natural looking synthetic thatch product in the marketplace today. *"A normal natural thatch might last you 3 to 8 years," Hans Tanutama, VP of Sales, "but our new Virothatch product lasts at least four times as long."* In fact, Viro™ is so comfortable with the durability of the product that it comes with a 20 year limited warranty!

Virothatch™ is available in two finishes; Bali, a smooth honey colored fiber that replicates natural thatch and Java, our slightly textured fiber in browns, honey and ivory.

Why is Virothatch™ better than natural thatching synthetic products?

- Totally maintenance free.
- Does not mold, rot, decay or shed.
- Resists termites, birds and other pests.
- Installation costs are low, since no specialized craftsmen are needed for installation.
- Low wind load rating makes it breathable in high winds.
- Does not fade or discolor in the elements.
- Built-in fire retardant.
- 100% recyclable since it's made of one material, HDPE.

P.T. Polymindo Permata was established in 1985 in Tangerang, Indonesia and is now the largest plastic extrusion specialist in the world. Utilizing this same technology Virofiber (www.virofiber.com) launched in the U.S. in 2004, and soon became the premier all-weather wicker provider for top outdoor furniture brands in both Europe and the United States.

As an environmentally conscious company, Virofiber weaves core green values into the fabric of its business philosophy-a philosophy built on the foundation of a triple bottom line approach that includes environmental, social, and fiscal responsibility. To see more visit www.virobuild.com
